ABOUT

Ambitious DevOps Engineer adept at developing and implementing automation processes, optimizing infrastructure, and ensuring seamless collaboration between development and operations teams to drive continuous integration and delivery.

Eager to learn and experience as much as possible, willing to sit and study every needed unfamiliar subject/tool to perfection.

Curious and love new technologies and tools that make our lives easier!

EXPERIENCE

DEVOPS ENGINEER

- Reveal Security.** Ramat Gan | Oct 2022 - Oct 2023
- Managed and deployed production environments on Air-gapped on-prem systems using Kubernetes.
 - Managed and deployed SaaS production environments on AWS accounts using various services.
 - Built an automated set of tools for AWS account cost-management and optimal clean-up that reduced unnecessary resource consumption and costs.
 - Implemented monitoring and alerting systems (e.g., Prometheus, Grafana) to ensure high availability and performance.
 - Utilized infrastructure as code tools (e.g., Terraform) to streamline provisioning and scaling processes.
